

Circulatory Maze

DID YOU KNOW?
Your circulatory system carries blood from your heart to other parts of your body through blood vessels!
Color in your vital organs!

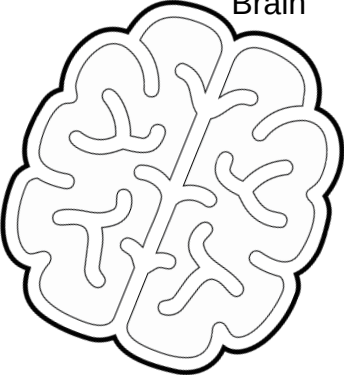

Intestines

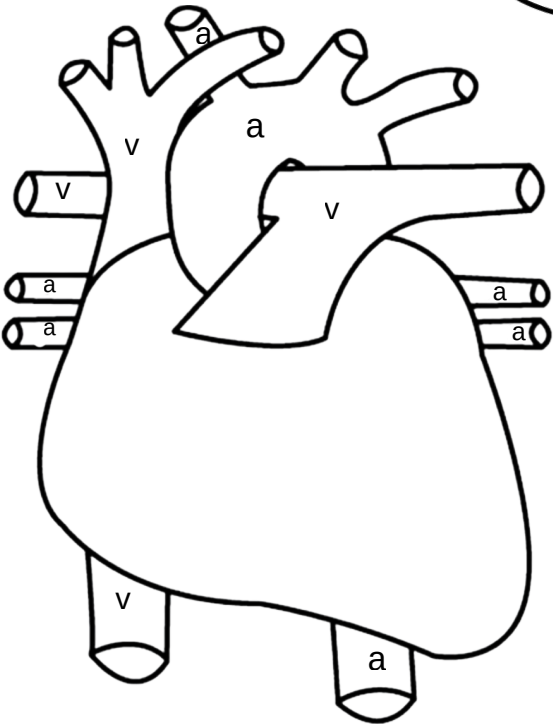

Lungs

Kidney

Brain

ARTERIES
Arteries carry blood away from the heart.
Color all the “a’s” red.

VEINS
Veins carry blood towards the heart.
Color all the “v’s” blue.

Learn with Echo, Artie, and Vienna!

Hello! These are my friends Artie and Vienna! They help build the passageways for blood from all around your body to travel to and from your heart. Artie takes care of the **arteries**, carrying **oxygenated blood** away from the heart. Vienna supports the **veins**, carrying **deoxygenated blood** back to the heart. **Circulation** is a cycle, moving blood through the heart and around the body!
