

Color and count each type of goo in the artery.

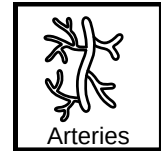

Riddles

Match each riddle to the picture that answers it.

I stick to your arteries, but I'm not glue.
I build up slowly from sugary food you chew.
I can make it hard for blood to go through,
What am I?

I carry blood away from your heart,
helping your body do its part.
What am I?

I help push blood all through your body,
too high is not good for anybody.
What am I?

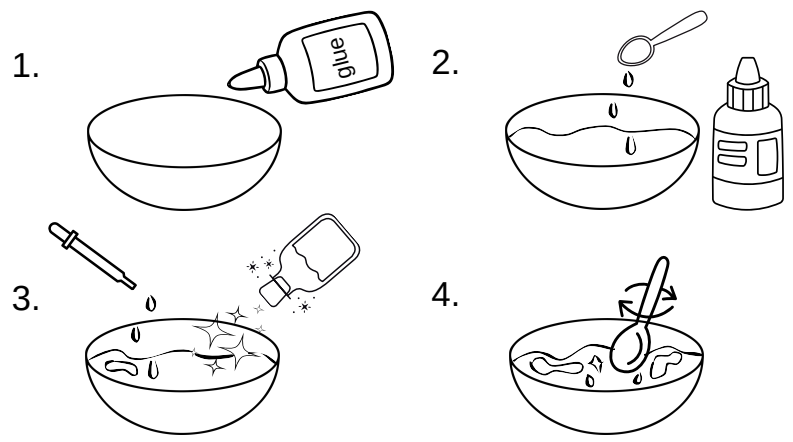

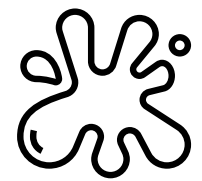

1. Plaque, 2. Cholesterol, 3. Blood Pressure

Plaqtrick's Slime Recipe

Ingredients:

- 1 Bottle of clear glue (4oz to 6 oz)
- 2 tsp of liquid slime activator solution (plus more if necessary)
- Optional: yellow food dye & yellow glitter

Learn with Plaqtrick and Echo!

Hello! This is Plaqtrick, the **plaque** inside of you!
He's an ooey-gooley mix of **cholesterol**, fat, and sugar that builds up along the walls of your arteries. When he accumulates over a long time, his goo hardens, which can cause your arteries to narrow, a condition called **Atherosclerosis** (sounds like: ah-thuh-roh-skluh-roh-sis). This forces your heart to work harder to pump blood around the body, increasing risk factors like **high blood pressure**.
